JUMPER

Game Design Document · Game Development Fundamentals · Assignment 8-9 · Narxoz University

1. TITLE + PITCH	**Jumper.** A 2D mobile platformer where the hero runs, jumps and shoots through three levels and defeats a boss to escape.
2. GENRE / PLATFORM	2D platformer with shooting. Android and iOS, **landscape** (reference resolution 1920 x 1080).
3. 2D OR 3D	**2D.** Unity 6 (6000.6.0f1), Universal 2D. The hero is a sprite character with run, jump, shoot and hurt animations.
4. CORE LOOP	**Run** → **Jump** → **Shoot** → **Collect** → **Reach the exit.** The player moves across platforms, jumps over gaps and traps, shoots enemies, collects coins, and reaches the exit flag. Level 3 ends with a boss fight. Losing all hearts restarts the level.
5. CONTROLS	**Joystick** (bottom-left): move left / right. **Jump** button (bottom-right): jump. **Fire** button (bottom-right): shoot. **Pause** button (top-right): stops time and opens the pause menu (Resume, Restart, Menu). HUD: **3 hearts** (top-left), **score** (top-center). All buttons are at least 120 x 120 px in the reference resolution.
6. CONTENT	**3 levels** (forest, cave, castle). **2 enemy types**: walker and flyer, plus **1 boss** on level 3. **Items:** coins (score) and heart pickup (+1 life). Hazards: spikes and pits. **Screens:** Main Menu, HUD, Pause, Game Over.
7. ART AND SOUND	Pixel-art style with one shared color palette. Free asset packs (Kenney / itch.io, CC0) chosen to match each other so all levels look like one world. Simple chiptune-style music and a small set of sound effects (jump, shot, hit, coin, boss).
8. MVP (week-15 build)	Three playable levels with a boss fight. Player movement, jump and shooting with on-screen controls. Two enemy types with simple AI. Hearts, score and win / lose. Main Menu, HUD and Pause working on 16:9, notch phones and tablets. Progress saving. Basic sound and effects.
9. CUT LIST (NOT making)	Multiplayer and online leaderboard. In-app shop and purchases. More than 3 levels. Multiple playable characters. Cutscenes and story dialogue. Level editor. Gamepad support.
10. PLAN (weeks 9-13)	**W9:** game idea, GDD, GitHub repo, Main Menu / HUD / Pause UI. **W10:** player controller, levels 1-3 layout, enemy AI. **W11:** saving, coins, hearts, game over. **W12:** sound and music. **W13:** particle effects, boss polish, bug fixing, final build test.
ROLES	Solo developer until week 14: design, code, UI and testing. Team roles will be assigned when final-project teams form in week 14.
